

Business Spiritual Healing Specialist of the Year 2023 (USA): Joy Pedersen

Dr. Joy S. Pedersen is a licensed intuitive spiritual healer and coach, helping those who seek her services to identify the hidden, root causes of the challenges they face regarding matters such as money, business, relationships, mindset, health, and overall well-being. Serving clients from around the globe from her home base in Florida, Joy works with those from all walks of life, from stay-at-home mothers to politicians, CEOs, and celebrities. We hear from Joy as we learn more about her company, Express Success LLC.

Spiritual healing can be carried out through many different modalities and practices. Tools, techniques, and spiritual gifts may release energetic blockages, lower energies, and unreleased emotions and align people, places, circumstances, and things in the highest and most favorable light.

Old programs, limiting beliefs, negative memories, and emotions can prevent us from manifesting what we want, whether that's peace, love, prosperity, or any other kind of positive abundance.

Dr. Joy S. Pedersen started Express Success LLC while working in Hollywood to help those struggling in the entertainment business by teaching the Law of Attraction.

Dr. Joy tells us, "When working at Paramount, I noticed many people that called to network with me, struggled in getting work and other ways. I wanted to help them but found them achieving inconsistent results applying Law of Attraction techniques. Someone may have successfully found a job but continued to struggle with confidence. Someone else may have made more money but continued having relationship challenges. I realized there had to be elements within blocking the preferred outcomes. I searched for a solution and discovered spiritual healing."

Besides learning the subconscious held the programming that attracted the results people experienced, she learned spiritual healing could release the programs. She also discovered she was intuitive and could read energy, the subconscious, which creates our programming that attracts our results.

Joy serves a multitude of international clients with diverse religious and non-religious belief systems. Her practice is also varied as she frequently works with business owners on their personal and business lives. In one session, she may address issues they, their spouse, or their child may be having, then challenges with their employees, sales,

or distribution. The cause is sometimes with the subconscious but also in energies of environments, property, and situations that need releasing.

For Joy, it's not about simply dealing with current situations. Her work may include deeper causes of trauma or repetitive patterns. She elaborates, "During our sessions, I am often taken to past-life scenes where a negative memory holds the unreleased trauma and then clear storylines, negative emotions and energies from the situation."

Joy's important work is easily accessible to people worldwide. Joy says, "My industry grows as the collective's consciousness expands. Within the spiritual community are infinite perspectives, and a client needs to find someone who resonates with them and theirs." Her experience guides her through every interaction with her clients. It helps her to support them in any way they need for their personal lives, careers, or relationships.

Joy firmly believes that her clients find her when they need someone to help them on their journeys. She explains, "People often come to me because they don't understand why they aren't getting the results they seek doing all the "right" things. They may not understand that results are manifested by the subconscious."

The unconscious mind can be connected through therapy, meditation, and dream analysis, but Dr. Joy uses her intuitive abilities - giving us a better understanding of how our deeper mind works and what we may feel under the surface. Joy's spiritual healing is an extension of that work - and her understanding of the subconscious has propelled Express Success LLC to a very bright future.

Bestowed with the title of Business Spiritual Healing Specialist of the Year 2023, in the USA, Dr. Joy S. Pedersen's award-winning status is yet another achievement as she continues to help people with their lives - regardless of where they live, their spiritual blockages, or their desired results.
